

BRAVO DP

BRAVO DP undersink filters have been designed for the production of good and pure water directly at the point of use. The filters can be easily installed under the kitchen sink with a special tap, to be fitted to the sink top, dedicated to the delivery of pure water only, to be used for drinking, cooking and preparing of foods and drinks.

BRAVO DP

undersink filters for drinking water at its best

BRAVO DP performs Patented and Registered Model Housings.

Thanks to the single head design, BRAVO DP DUO and TRIO have no need for connections nor fittings in between the housings, no work for connections and no risk of leaking. The housing head is stronger and more reliable than ever.

In addition, thanks to the design, the width is dramatically reduced **saving space for the installation.**

Flow rate in litres per minute (l/m) is the average water flow from the dedicated tap (filtered water) using a new cartridge. The flow rate may vary in function of water quality and time in service (life-span) of the cartridges. Life-span is the average working life of the cartridge. It depends on the water quality, which is an extremely variable factor: life-span is indicated for a mains water supply with average european characteristics. BRAVO DP are not potable water-makers: control the water quality before installation.

BRAVO DP CASE

Portable undersink filters for drinking water at its best

BRAVO DP CASE performs the Patented and Registered DP Trio housings.

This model can be used under the kitchen sink, keeping the housing and connection sheltered and protected by its robust case. Portability and easy connections make this filter a convenient solution when moving to other places where water filtration is required: bring your pure water along with you ever!

FA 5 micron SEDIMENT. Wound polypropylene filter. Filtration of sand, scales, lime, rust, fine particles. Life-span: 3-6 months.	PP/CPP 5 micron SEDIMENT. Melt-blown polypropylene grooved (PP) or smooth (CPP) filter: high efficiency filtration of fine particles, rust, lime, sand, scales. Life-span: 3-6 months.	BT PP LA 5 micron SEDIMENT G.A.C. Melt-blown polypropylene filter and Granular Activated Carbon. Filtration of fine particles, rust, lime, sand, scales; reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc). Life-span: 3 months.	LA CARBON G.A.C. Container with Granular Activated Carbon. Reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc). Life-span: 3 months.
AB 0,45 micron CERAMIC. Filtration of very fine particles and some micro-organisms. Life-span: 6-12 months. Maintenance: surface scraping every 2-3 months.	CB 5 micron CARBON BLOCK. Filtration of fine particles (rust, lime, sand, scales); reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc). Life-span: 3-6 months.	CA-SE 0,3 micron CARBON BLOCK. Filtration of very fine particles and some micro-organisms; reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc). Life-span: 6-12 months. Maintenance: surface scraping every 2-3 months.	CA-SE HF 0,15 micron CARBON BLOCK. Microfiltration with "hollow-fibre" capillary membranes (STER-O-TAP®) of very fine particles and some micro-organisms; reduction of chlorine (bad tastes, odours) and chloride pollutants (pesticides, solvents, etc). Life-span: 6 months. Maintenance: surface scraping every 2-3 months.

variants

Cartridges available on demand

- GAC-Ag** Granular Activated Carbon Silver treated.
- QA-AF** Anti-nitrate ionic exchange resin.
- KDF** Heavy-metals and chlorine reduction medium.
- CA-SE HF-U** Carbon block with "hollow-fibre" ultra-filtration element at 0,02 micron.

Cartridges with double O-ring quick-fit system **BX**.

Remark: BRAVO DP housings fit to **BX** and standard **SX** (DOE) cartridges.
